SUMMARY

Data Science undergraduate (GPA: 3.93/4.00) with a consecutive national competition track record in AI and Data Science. Experienced across the full data lifecycle, spanning robust ETL data pipelines, database architectures, machine learning and deep learning models, business analytics, and AI automation systems.

EDUCATION

Telkom University September 2023 - Present
Bandung, Indonesia
Bachelor of Data Science - 7th Semester - GPA: 3.93/4.00
• **Honors:** Top 20 Semifinalist at Satria Data 2026, 4th Place National at Satria Data 2025, Top 7 Finalist at Datathon UI 2025, ADIKARA 2024 Finalist

EXPERIENCE

Teaching Assistant Coordinator - Big Data Laboratory 2026 - Present
Telkom University Bandung, Indonesia
• Coordinate 14 lab assistants and 15+ members across data science and AI learning programs and collaborative projects
• Develop AI Engineering study group modules on LLMs, RAG, tool calling, and practical AI systems

Teaching Assistant - Intelligent Systems March 2026 - June 2026
Telkom University Bandung, Indonesia
• Guide 40+ students in implementing artificial intelligence algorithms and provide technical feedback on assignments

Research Assistant - Illegal Gold Mining Detection January 2026 - April 2026
Telkom University Bandung, Indonesia
• Built a multi-temporal satellite ML pipeline in Google Earth Engine (GEE), fusing optical and SAR radar data with Random Forest to detect illegal gold mining (2022–2025)
• Engineered hybrid spatial filters to eliminate false-positive noise, achieving 98.88% (Kalteng) and 90.88% (Jambi) F1-scores, and exported Shapefiles for interactive GIS web map integration

SELECTED PROJECTS

Social Video Insights | 4th Place National - Satria Data 2025 by Kemdiktisaintek RI 2025
• Built a multimodal AI dashboard to extract structured insights from 1,000 social media videos across text, audio, and visual data
• Integrated transcription, visual extraction, topic modeling, entity recognition, and LLM summarization into an analytics dashboard
• [social-video-multimodal-analysis](#) | Python, Whisper, BLIP-2, BERTopic, GLiNER, Qwen, HuggingFace, Next.js

Lenta AI Operations System | Autonomous WhatsApp AI Agent & Workflow Orchestration 2026
• Engineered an autonomous WhatsApp AI agent via LLM tool-calling to handle live stock queries, pricing, and order creation
• Orchestrated multi-API n8n workflows with customer recognition, message buffering, and automated low-stock and order alerts
• [lenta-ai-operations-system](#) | n8n, OpenAI API, LLM Tool Calling, WhatsApp Cloud API, Supabase, Webhooks

SQL Data Warehouse Project | ETL, Data Cleansing, Data Modeling 2026
• Engineered a Bronze-Silver-Gold data warehouse via SQL Server stored procedures, integrating 6 ERP and CRM sources with robust ETL pipelines and idempotent loads
• Executed data cleansing using Window Functions, designed a Star Schema for analytics, and wrote comprehensive data quality validation scripts across all layers
• [SQL-Data-Warehouse-Project](#) | SQL Server, T-SQL, ETL, Data Warehouse

Narapangan | AI Food Price Forecasting & Prescriptive Decision Platform 2026
• Built an automated daily data pipeline using Playwright and weather APIs to forecast commodity prices via benchmarked N-BEATSx models (6.33% MAPE, 93.3% directional accuracy)
• Integrated Gemini LLM with a full-stack React 19 and SQLite dashboard to deliver tactical procurement advice and accuracy audit tracking
• [Narapangan](#) | Python, NeuralForecast, N-BEATSx, Gemini LLM, Playwright, SQLite, React 19

SKILLS

Programming Languages : Python, SQL, Go, C++
Machine Learning & AI : PyTorch, OpenCV, LangChain, Scikit-learn, HuggingFace, Transformers, NeuralForecast, LLM APIs
Domains : Data Analytics, Machine Learning, Data Engineering, AI Automation, Computer Vision, Time-Series Forecasting
Data & Deployment Tools : SQL Server, PostgreSQL, Supabase, ETL, Pandas, Excel / Google Sheets, Docker, Git, Power BI, n8n
Languages : Indonesian (Native), English (Conversational)
