Bekasi, Indonesia

SUMMARY

Data Science undergraduate (GPA: 3.93/4.00) with a national competition track record in Data Science and AI. Experienced in end-to-end machine learning pipelines for classification, forecasting, computer vision, NLP/multimodal analytics, geospatial ML, and AI automation, with data cleaning, EDA, and feature engineering across projects.

EDUCATION

Telkom University September 2023 - Present
Bandung, Indonesia
Bachelor of Data Science - GPA: 3.93/4.00
• Achievements: 4th Place National at Satria Data 2025, Top 7 National Finalist at Datathon UI 2025, ADIKARA 2024 Finalist

EXPERIENCE

Vice Coordinator - Big Data Laboratory 2026 - Present
Telkom University Bandung, Indonesia
• Coordinate 14 lab assistants and 15+ members across data science and AI learning programs and collaborative projects
• Develop AI Engineering study group modules on LLMs, RAG, tool calling, and practical AI systems

Teaching Assistant - Intelligent Systems March 2026 - Present
Telkom University Bandung, Indonesia
• Guide 40+ students in implementing artificial intelligence algorithms and provide technical feedback on assignments

Research Assistant - Illegal Gold Mining Detection January 2026 - April 2026
Telkom University Bandung, Indonesia
• Designed a binary classification approach to detect illegal gold mining (ASGM vs non-ASGM) in Central Kalimantan and Jambi using satellite data from 2022–2025
• Achieved 98.88% F1 (Central Kalimantan) and 90.88% F1 (Jambi) in ASGM prediction analysis

SELECTED PROJECTS

Social Video Insights | 4th Place National - Satria Data 2025 by PUSPRESNAS 2025
• Built a multimodal AI dashboard to extract structured insights from 1,000 social media videos across text, audio, and visual data
• Integrated transcription, visual extraction, topic modeling, entity recognition, and LLM summarization into an analytics dashboard
• [social-video-multimodal-analysis](#) | Python, Whisper, BLIP-2, BERTopic, GLiNER, Qwen, HuggingFace, Next.js

Narapangan | Food Price Forecasting Dashboard 2026
• Built a forecasting web app for Bandung chili prices using PIHPS, NASA POWER weather data, and Hijri calendar features (5% MAPE)
• Developed ingestion, feature engineering, model inference, four-week forecasting, and procurement signal pipeline
• [Narapangan](#) | Python, Pandas, N-BEATSx, N-HITS, Forecasting, React

IDX Smart Rebalance | Top 7 National Finalist - Datathon 2025 by Universitas Indonesia 2025
• Engineered an Indonesian stock portfolio allocation system using forecasting, geopolitical news signals, and Deep Reinforcement Learning
• Improved a 60-day portfolio simulation from -9.34% to +4.75% total return (Sharpe: 0.79, max drawdown: -14.4%)
• [idx-smart-rebalance](#) | Python, FastAPI, Stable-Baselines3, NeuralForecast, Deep RL

Lenta AI Operations System | WhatsApp AI Agent & Operations Dashboard 2026
• Built an AI agent system for WhatsApp customer service, ordering, inventory management, and owner notifications
• Orchestrated tool calling, customer recognition, multi-message buffering, and a real-time operations dashboard
• [lenta-ai-operations-system](#) | n8n, Supabase, AI Agent, Tool Calling

SKILLS

Programming Languages : Python, SQL, Go, C++
Machine Learning & AI : PyTorch, OpenCV, LangChain, Scikit-learn, HuggingFace, Transformers, Stable-Baselines3
Domains : Computer Vision, NLP, Multimodal AI, Time-Series Forecasting, Reinforcement Learning, Geospatial ML
Data & Deployment Tools : Pandas, NumPy, Matplotlib, Seaborn, Google Earth Engine, FastAPI, Docker, Git, Power BI, n8n
Languages : Indonesian (Native), English (Conversational)
Projects : 10+ ML projects completed
